Education

2019 –Academy of Economic Studies-Faculty of Cybernetics, Statistics and Economical Informatics
Year I at Economic Informatics.

Caracal, Bac diploma , Highschool "Mihai Viteazul", 2019.

School Projects

During my university years, I was required to complete a number of assignments.

I have worked with some of my classmates, or alone, in several programming languages.

My most notable projects are:

-Front-end personal site. For a long time, I wanted to build my own site, in my own spare time and use it as a CV. It still needs to be modified to fulfill that role, but only by constructing it I have received much knowledge (for the site to be hosted, I had to load it up on github):

<https://github.com/lieautman/Cristian-Mihail-Dumitrescu-site>

- Web project for year 3 semester 1. Me and 2 colleagues completed a web app alike github/bugzilla. The front-end is in React+Redux and the back-end is in Express. It is a javascript app. Github code: <https://github.com/lieautman/Proiect-Tehnologii-web>

-Project in C# for year 2 semester 2. Visual form project for a telephone company's desk. In the end it should be able to receive and send data to a database.

https://github.com/lieautman/Proiect-anul2-sem2-programarea_aplicatiilor_windows

-Project for year 2 semester 2 in UI Studio. I have developed an automated process that scrapes the BVB website for information about the best businesses to invest in in Romania. The robot creates a local database that can be used further to implement a trading bot.

Professional experience

My professional experience is limited, being in third year of college.

Have participated in an internship for an IT auditor position, in Banca Transilvania. Sadly, I could not fill in a position because of my lack of networking knowledge and the time pressure from university (having to take my degree, by writing a project).

I have the ability to efficiently operate on different types of OS; a good understanding of Microsoft Office (Word, Excel și PowerPoint), of course; basic knowledge of some graphical popular applications (ex: Adobe Illustrator, Photoshop).

C/C++, C#, JAVA, Python, Javascript, HTML, CSS are the programming languages I feel confident in. I also know some language specific frameworks and libraries, proving my adaptability. (ex: Express, React, numpy, pandas).

I have Oracle MySQL Certificates in the SQL and PL/SQL languages.

I have a vivid team spirit, enthusiasm, flexibility and attention to details.

Foreign languages

Romanian-native language

English – experienced: writing, reading, speaking. Have CAE Cambridge Certificate 107 points.

French- experienced: writing, reading, speaking.
